Dear Ms. Woods,

Knowing this is the result of a "water theft" from Owens Valley:

(my photo 9/11/11 Owens Lake)

How can you possibly support the water theft from the Great Basin of Nevada and Utah?!!! I am also attaching a copy of the satellite view from Yahoo maps! This is surely enough evidence for stopping any water grab from Northeastern Nevada or anywhere in the North!

Sincerely,

Sally A. Bilyeu

Yahoo Maps, Satellite view of Owens Valley (and lake), CA shows that after water was diverted to Los Angeles in the early 20th century the lake dried out. Complete desiccation of the lakebed followed and by 1926 significant amounts of windblown dust were produced causing adverse health effects on area residents.
